

I want to stress to you the importance of K-Love to our community and yours. We all can benefit from the positive and encouraging music that is being broadcast by this station. The strong moral influence on our local families is something that would be greatly missed if it were to be displaced by another type of Low Power FM station. To take away the ability to get news and information from other parts of the country while listening to the wholesome music offered by K-Love would be against the public interest. For me personally It would cause me to listen to less radio and instead play a Cd or use internet radio- while I currently listen to 90% Fm broadcast radio. Please help us not to lose our wonderful station!
